Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: With respect to claims 1, the Prior Art does not teach an electric power steering device for controlling the output of a motor that applies an auxiliary steering force to a steering mechanism from a current reference value calculated based on at least a steering torque signal generated in a steering shaft, said device comprising: a duty ratio calculator for calculating a duty ratio D1 and a duty ratio D2 determined by a motor terminal voltage based on said current reference value; and a motor drive circuit including a motor connected across the output terminals and a power supply connected across the input terminals of an H bridge circuit made up of a first arm and a second arm each containing a pair of semiconductor devices connected in series, a PWM signal for a duty ratio D1 driving said semiconductor device in the upper stage of said first arm, and a PWM signal for a duty ratio D2 driving said semiconductor device in the lower stage of said second arm of said H bridge circuit, wherein said duty ratio calculator calculates said duty ratio D1 and said duty ratio D2 having a continuous characteristics between the motor current and a duty ratio D from said current reference value based on a specified calculation formula. Claims 1-8 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
